

Actera HA™

instant relief for dehydrated skin

Actera

Hydrate fatigued skin and improve the signs of aging with **Actera HA**. Our hyaluronic acid is created from the natural fermentation of carbohydrates and is available in several grades. A combination of low, standard, and high molecular weights helps to immediately hydrate surface and deep skin layers, plump fine lines, reduce inflammation and transepidermal water loss, and improve softness.

Multifunctional Active + Thickener

Actera HA provides natural gel-like thickening and unique slip for skin and hair care formulations.

INCI

Sodium Hyaluronate

Physical Description

White powder

Applications

- Skincare and haircare systems
- Hydrating, smoothing, and anti-aging
- Natural thickening for water-based formulas
- Adding silky slip to water-based formulas

Guidelines

- Sprinkle into water phase and mix until fully hydrated
