

TeraFluid™ Light

Ultra-Light Clean Label Fluid

Actera

TeraFluid™ Light is an all-natural polar emollient created from blending of two novel ferments.

Compatible with any oil phase and used to create light, dry, and fast absorbing formulations. Non-greasy and does not weigh down hair in hair care formulations.

Combine with botanical and vegetable oils to create lighter formulas with consumer appeal.

INCI

Saccharomyces Ferment (and) Aspergillus Ferment

Guidelines

- 1 – 10% in Skincare
- 1 – 3% in Hair Conditioners
- 2 – 10% in Hair Styling and Texturizers
- 3 – 5% in Deodorants

Combine with oil phase ingredients.

Applications

All cosmetic and personal care products where emollients, oils, esters, and silicones are typically used.
