

## Composition

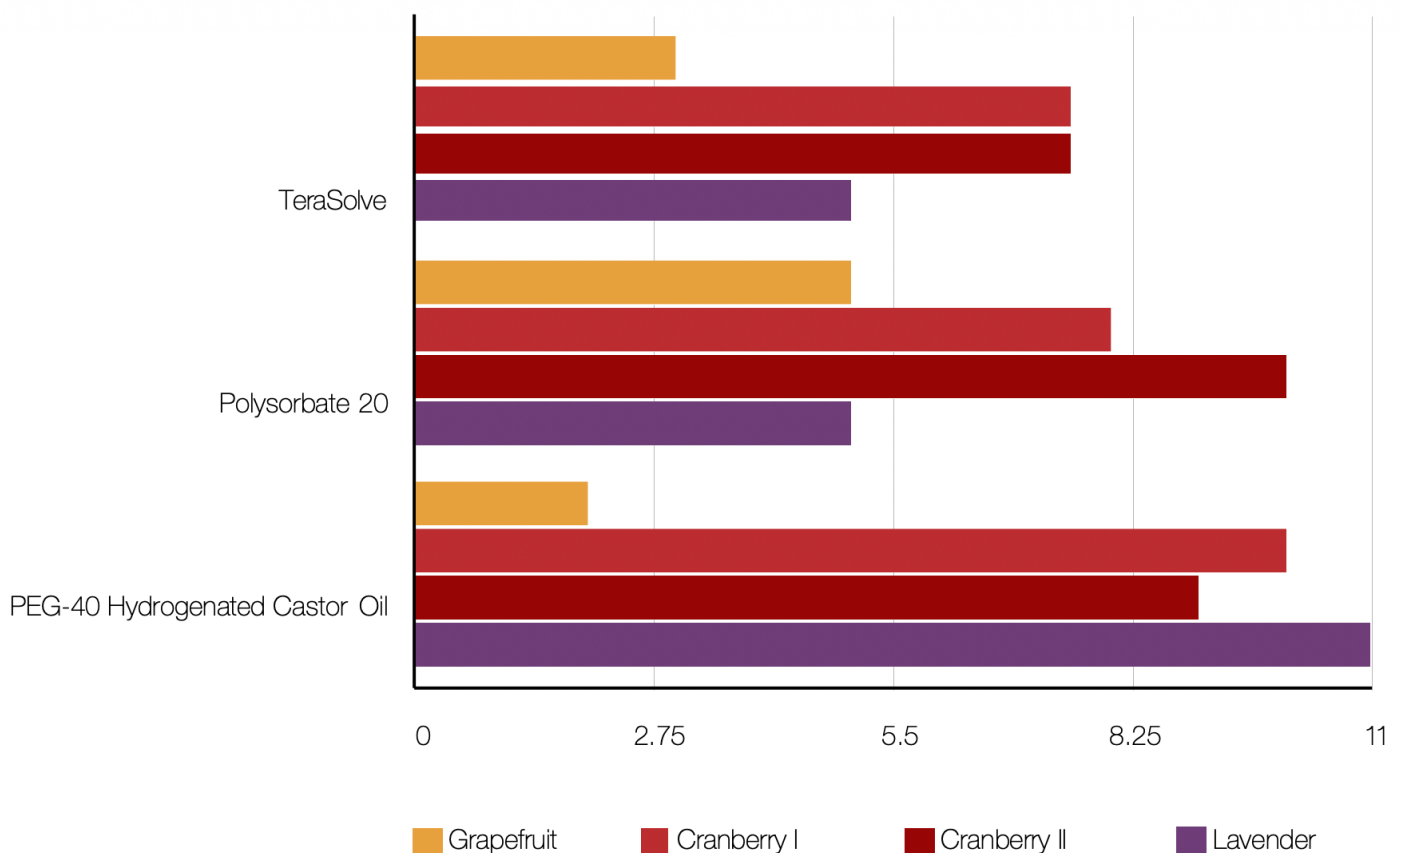

glycolipid (and) caprylyl/capryl glucoside (and) sodium cocoyl glutamate (and) olive oil polyglyceryl-6 esters

## Use

Solubilizes fragrances & essential oils into clear systems. Ideal for all water-based formulas: toners, micellar waters, make-up removers, floral essences, hair refreshers, and hair tonics.

## Performance

Comparable or better performance versus typical solubilizers. Fragrances tested below are all-natural (from Premier Specialties) at 1% use-level in water.

## Guidelines

Add fragrance to water, followed by 6X as much TeraSolve. Observe for 24 hours.

- If clear, try again with lower use of TeraSolve.
- If cloudy, add additional TeraSolve stepwise until clear, waiting 24 hours at each step.
